CHÂTEAU DE LA GRENIÈRE - LUSSAC SAINT EMILION

The Château de La Grenière vineyard covers the largest area of the estate and boasts a soil composition of rare uniqueness.

Merlot, Cabernet Franc, and Cabernet Sauvignon take root in a clay-loam soil with a subsoil dominated by blue clay—a component that is so valuable for imparting freshness to the wines during hot vintages.

The terroir and the aging process—half in oak barrels and half in tanks—result in a dense wine with ripe black fruit, menthol notes, and smooth tannins.

30,000 bottles produced

« Ripe dark fruits with hints of chocolate and tobacco. A juicy, fresh bouquet, creamy tannins, and a velvety mouthfeel. Smooth and lingering. »
James Suckling
